Said Mian JALIL Ahmed Sharaquri, MPA Punjab Pakistan ,

The epidemic of Covid 19 has shaken the whole world. The poor have been hit hard. The Pakistani government tried its best to do its best. By the special grace of God Almighty, we have been much safer than other nations, one of the reasons being that our immunity is better. Our people have largely supported each other during this epidemic. Our religion also teaches that before going to bed, make sure that your neighbor is not hungry. I sent messages to people in my area to take care of the ten houses around me, I myself quietly cared for the 100 poorest families closest to me and rations quietly reached their homes at night. This epidemic has taught us a lesson that we have to make every country and every city self-sufficient in food and medicine. The United Nations should also help all countries become self-sufficient in food and medicine. Older countries should spend on self-sufficiency of poor countries instead of arms and all nations should be encouraged to tolerate each other. No religion has the right to be harsh on another. There should be religious freedom and everyone should respect each other. Respected personalities of any nation should not be despised.
